Put No 11 to one of the end of No 2 and No 4

**Insert No. 7 into
both ends of No. 9
and make sure the
position is flat**

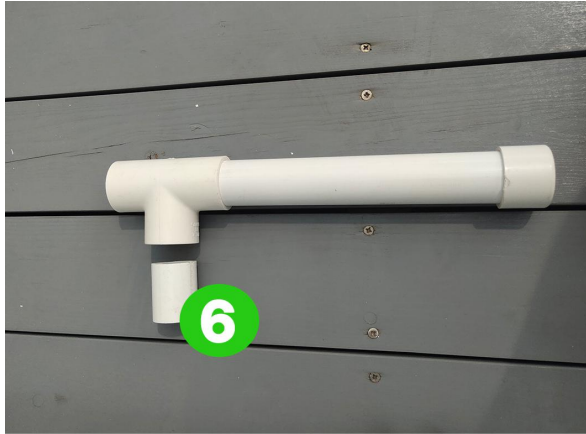

**Insert No. 4 into No. 10,
and make sure that the
height of 4 pieces is
consistent.**

**Insert No. 12 into No. 4,
and make sure that the
height of 4 pieces is
consistent.**

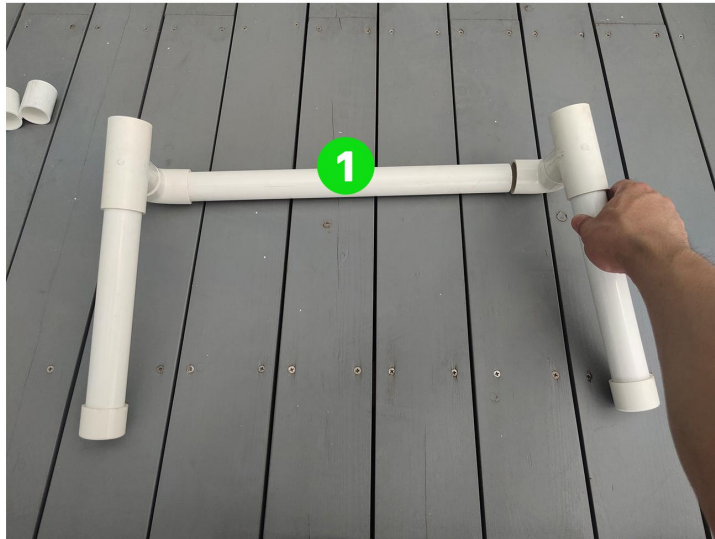

**Insert number 6 into
number 12**

**Install No. 8 to No. 6
as shown**

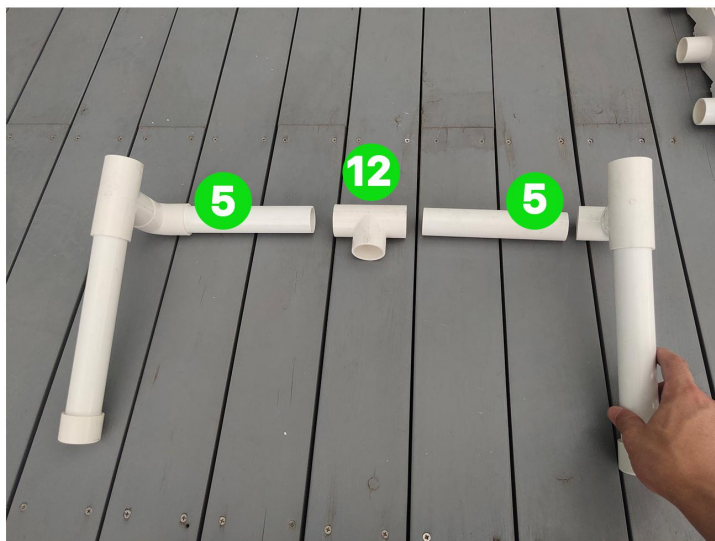

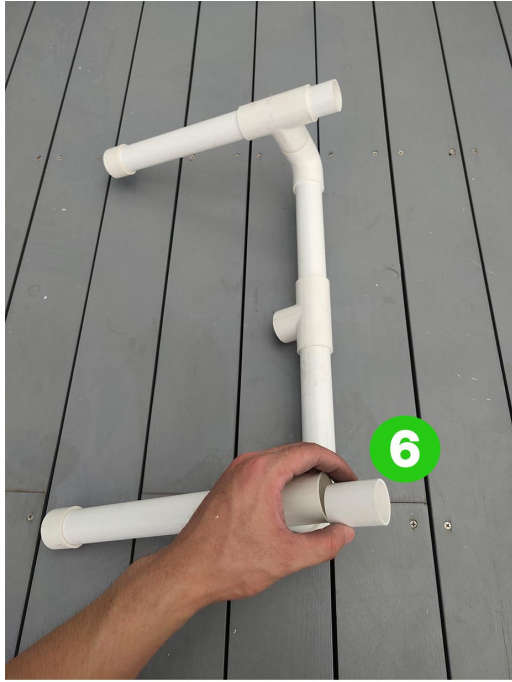

**Determine the
installation
direction**

Install both legs to both ends of No. 1

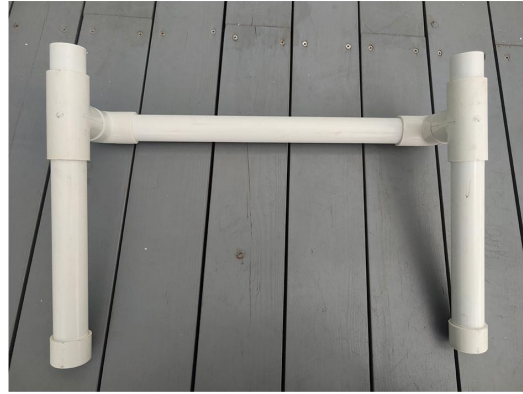

Install the other end as shown

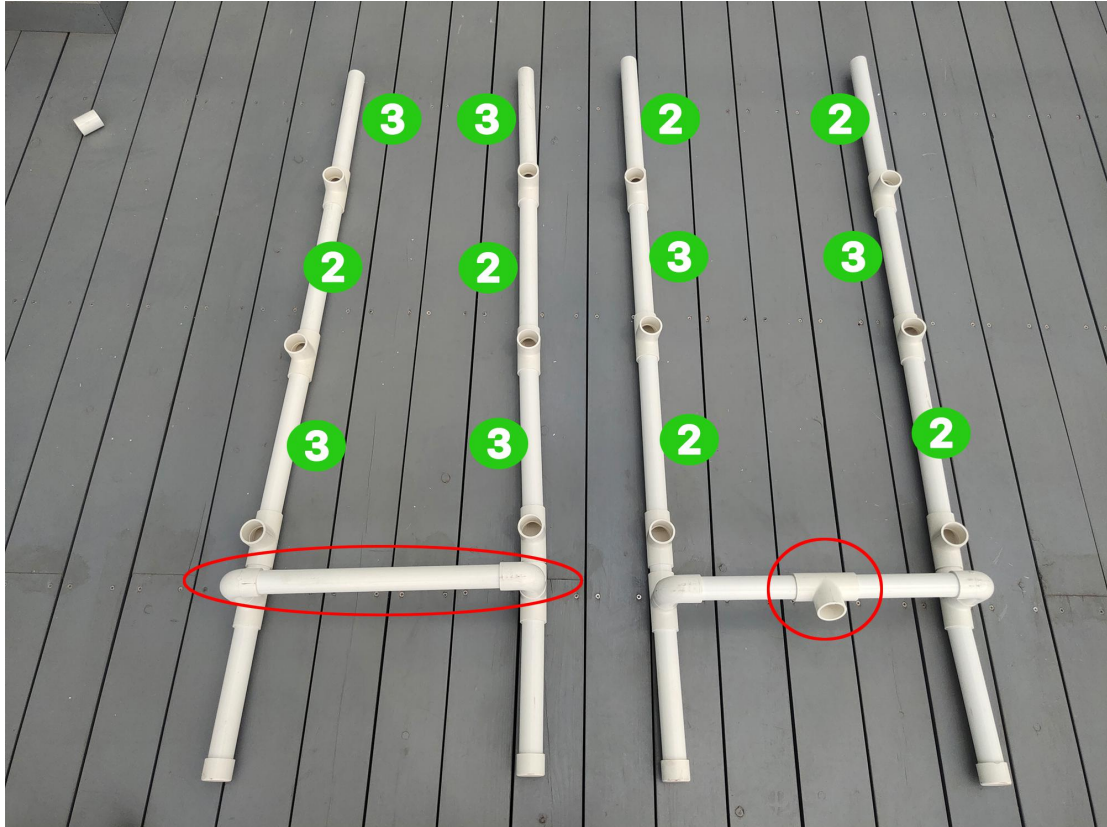

**Insert No. 6 into No. 12,
making sure the height
is the same on both sides**

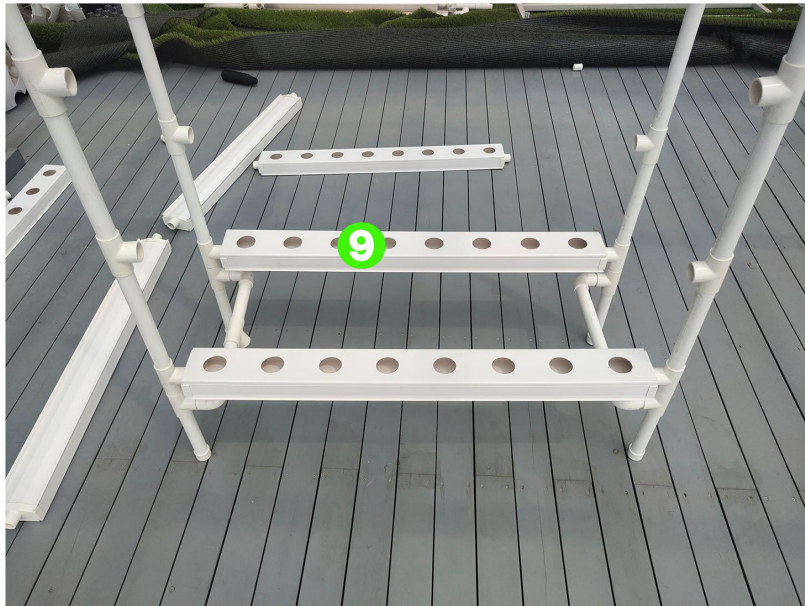

**Insert number 12 into the other end of number 6
to make sure the height is the same**

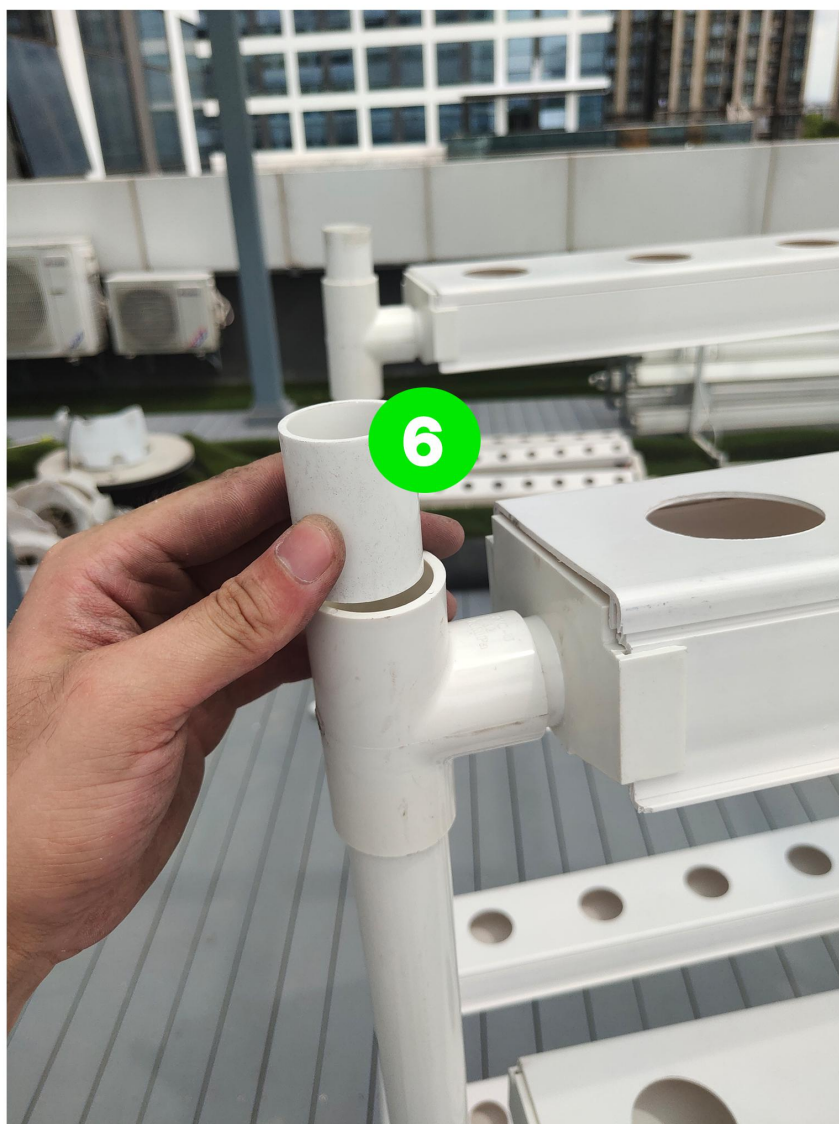

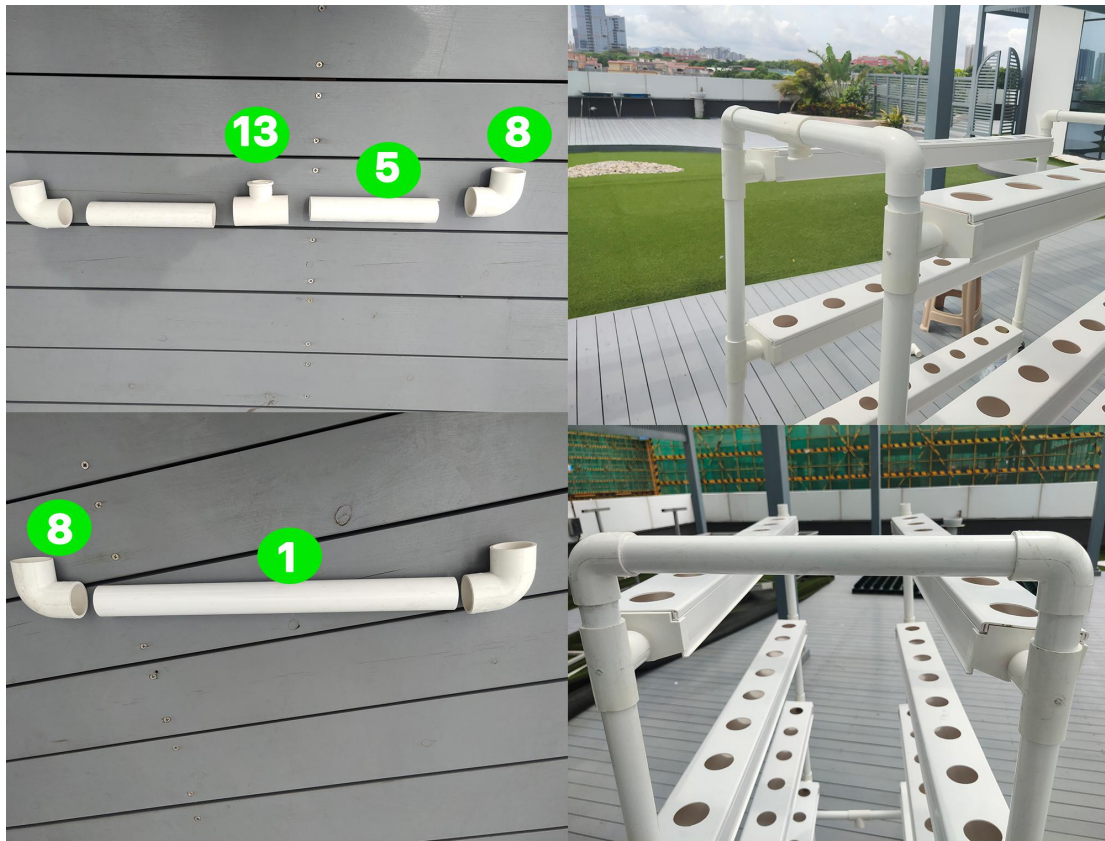

As shown in the figure, install the pipes with the corresponding specifications in order to ensure that the installation direction is correct and the height is consistent.

Install No. 9 into the bracket in turn

Install No. 6 to the four tops

As shown in the figure, install in sequence.

No14 (Flexible conduit) connect to No15 (Valve) and then connect to No 13
